Service Delivery

Standard 3:

Workforce &
Capability

Standard 4:

Environment &
Infrastructure

Standard 5:

Governance &
Quality

NZ ACCREDITATION FRAMEWORK

The New Zealand aged care compliance model divides evidence into two clear categories. This dual-structure approach ensures providers can demonstrate both policy foundations and practical implementation, meeting HealthCERT expectations for governance-ready, auditable documentation.

Purpose & HealthCERT Alignment

The NZ Accreditation Toolkit provides a structured evidence framework aligned with Health and Disability Services (Core) Standards and HealthCERT requirements, ensuring aged care providers maintain transparent, auditable compliance systems.

Required Documents (Core)

Foundational governance and policy documents including Consumer Rights, Clinical Governance, Workforce Strategy, Risk Management, Quality Improvement frameworks, and Facility Management policies that form your compliance foundation.

Supporting Documents (Implementation)

Implementation evidence including incident reports, care plans, training matrices, audit reports, KPI dashboards, maintenance logs, and committee minutes that verify compliance outcomes and demonstrate continuous improvement.

THREE PILLARS OF NZ COMPLIANCE

New Zealand's aged care compliance model is built on three foundational pillars that ensure providers maintain transparent, auditable systems aligned with HealthCERT expectations. These interconnected areas work together to deliver person-centred, governance-ready care that meets the Health and Disability Services (Core) Standards.

Governance & Risk

Governance Framework and Risk Management policies

Risk registers and audit reports tracking

KPI dashboards and committee minutes

Consumer Experience

Consumer engagement, feedback and advocacy policies

Resident meeting minutes and satisfaction surveys

Activity logs and advocacy records

Continuous Improvement

Improvement registers tracking quality initiatives

Benchmarking reports against industry standards

Performance monitoring and audit outcomes

INTRODUCING THE PRP QUALITY PLATFORM

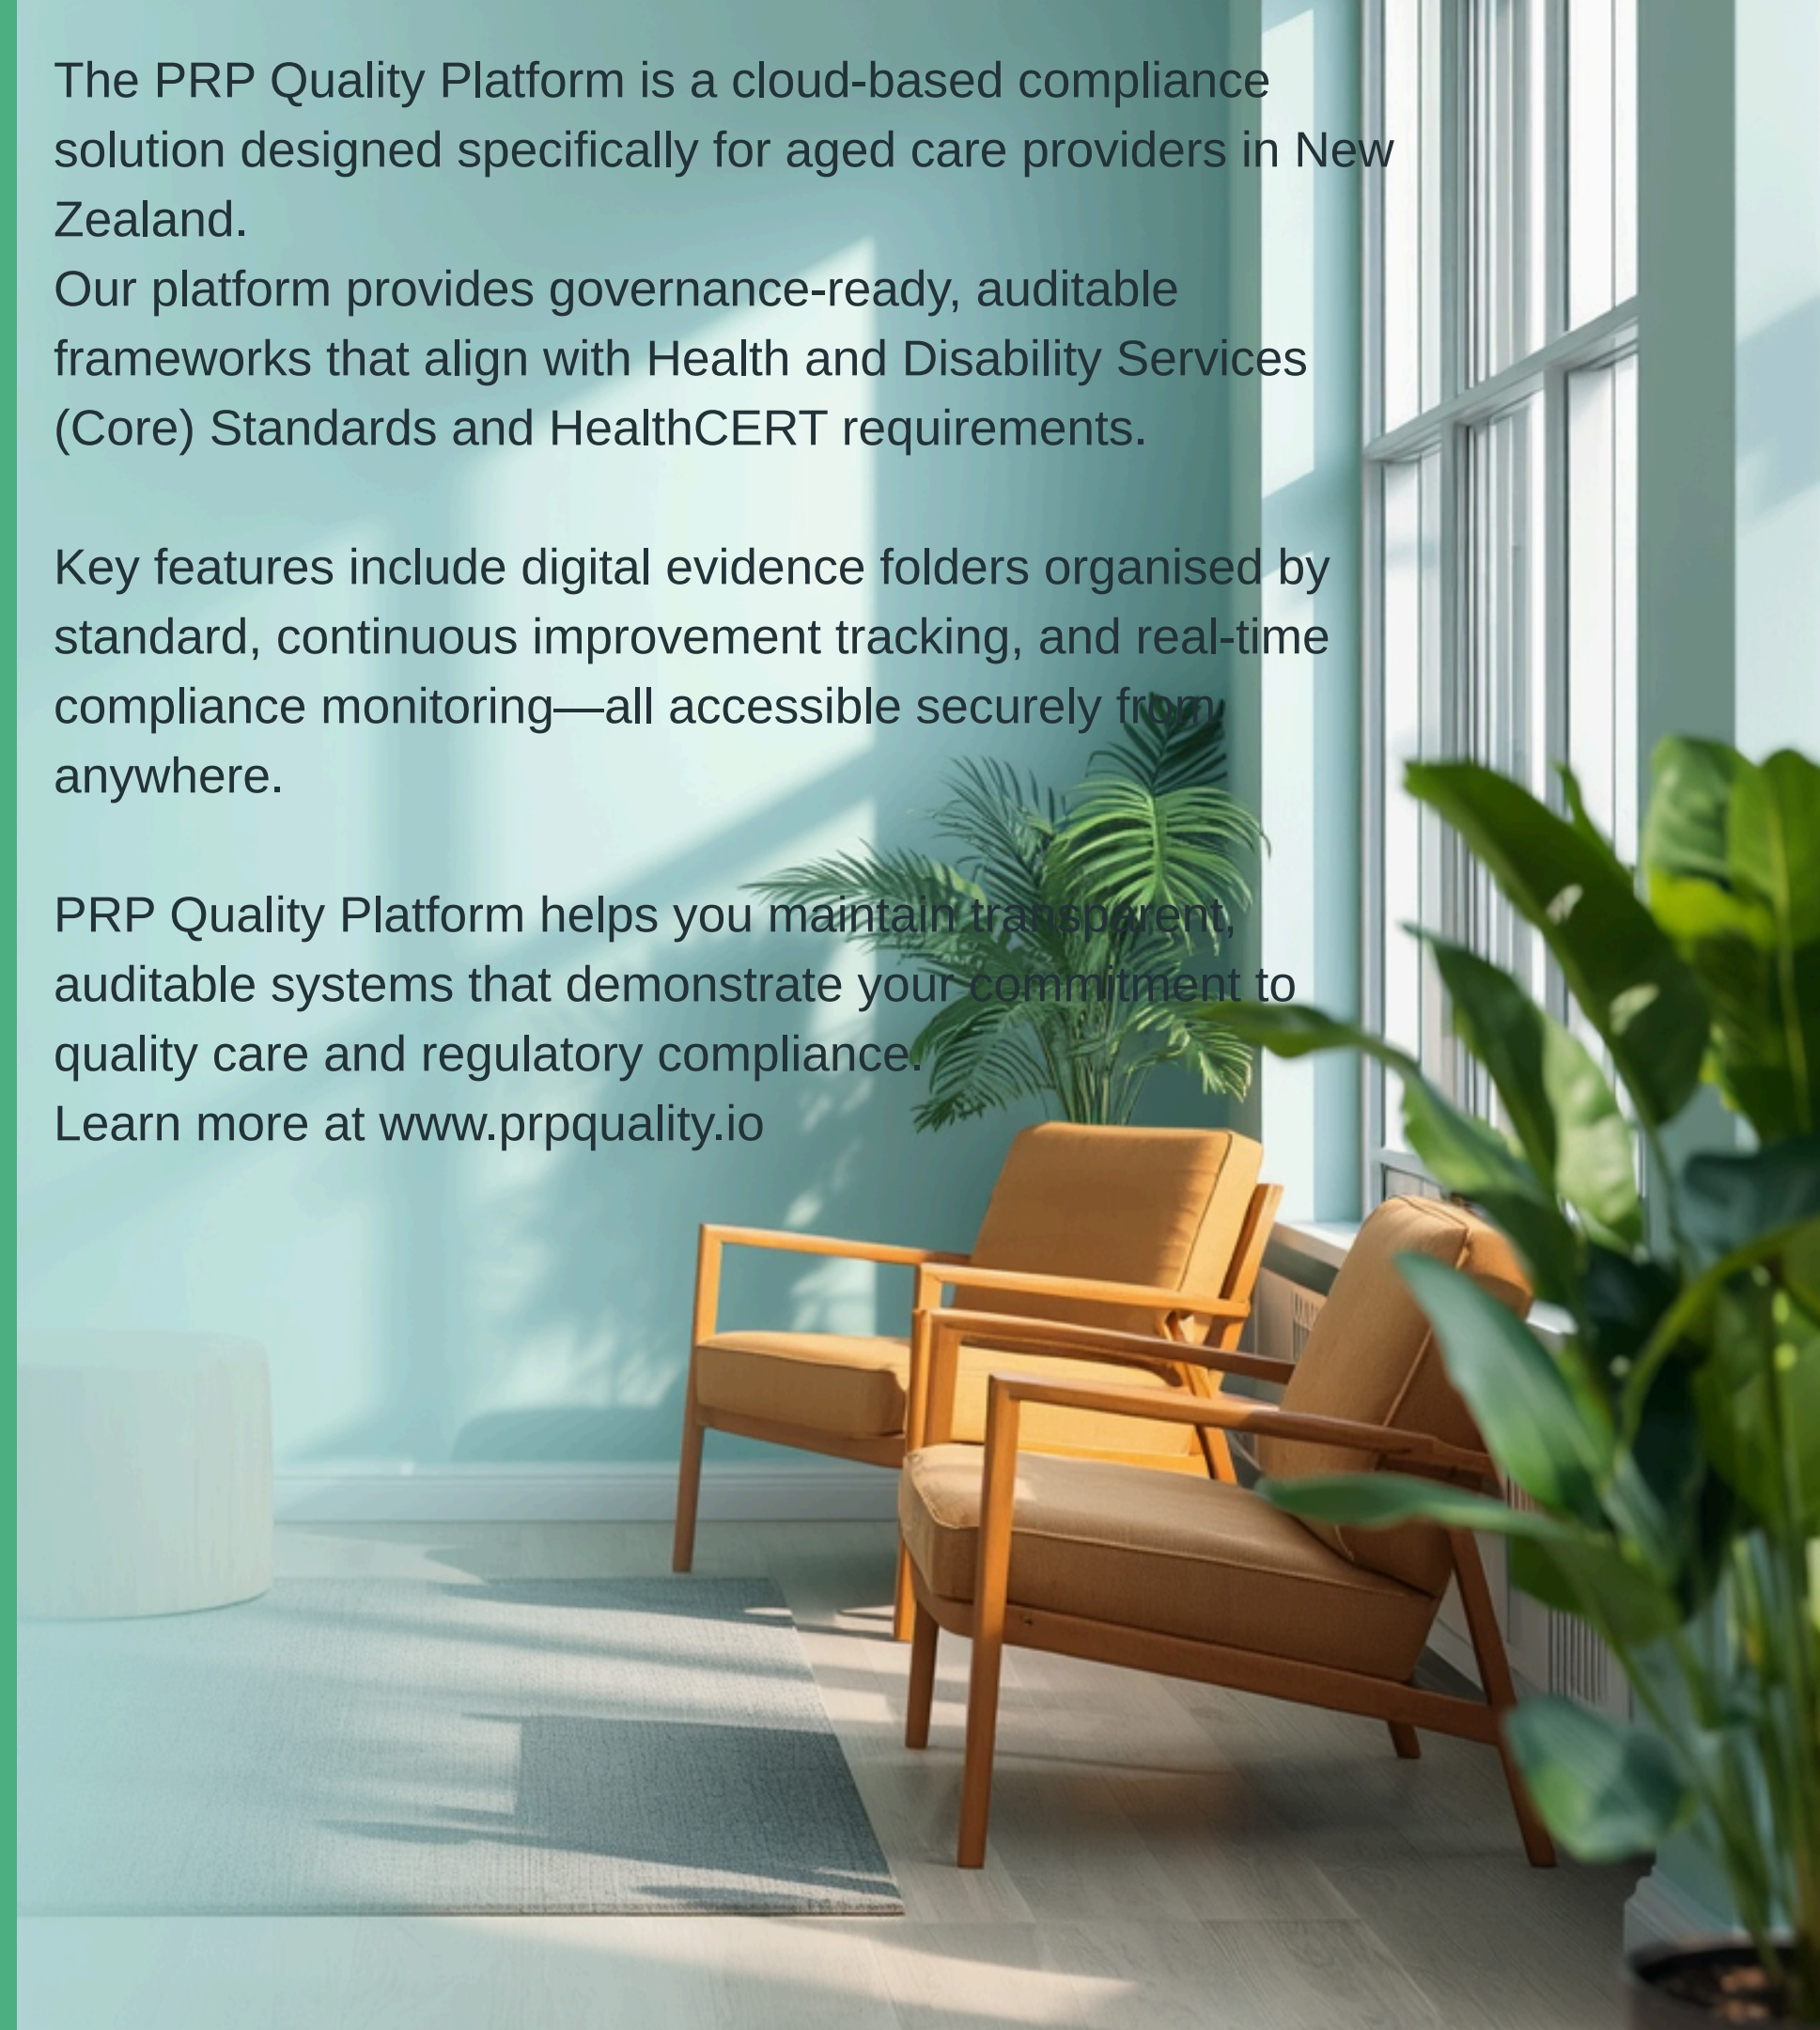

Governance-ready compliance at
your fingertips—anytime,
anywhere.

The PRP Quality Platform is a cloud-based compliance solution designed specifically for aged care providers in New Zealand.

Our platform provides governance-ready, auditable frameworks that align with Health and Disability Services (Core) Standards and HealthCERT requirements.

Key features include digital evidence folders organised by standard, continuous improvement tracking, and real-time compliance monitoring—all accessible securely from anywhere.

PRP Quality Platform helps you maintain transparent, auditable systems that demonstrate your commitment to quality care and regulatory compliance. Learn more at www.prpquality.io

PLATFORM FEATURES

The PRP Quality Platform delivers a comprehensive digital solution for aged care compliance and quality assurance. Our cloud-based system provides governance-ready, auditable frameworks that align with HealthCERT requirements and support your journey toward accreditation excellence.

Cloud-Based

Access

Secure compliance tools accessible anywhere.
Real-time collaboration across all facilities.

Digital Evidence

Organized folders for all seven standards.
Structured documentation for audits.

Quality Tracking

Star Ratings alignment with outcomes.
Continuous improvement monitoring.

What evidence should you be collecting? The PRP Quality Platform organizes documentation into structured, auditable categories that demonstrate compliance and quality outcomes:

The PRP Quality Platform provides a governance-ready, auditable framework for aged care accreditation. Evidence is organized into two key categories that align with HealthCERT requirements and support continuous improvement tracking across all compliance areas.

Governance Evidence

risk registers, incident reports, workforce compliance, training records

Clinical Evidence

care plans, medication records, audits, consumer feedback, quality indicators

Person-Centred Care

dignity, respect, cultural safety, and individual choice at the core

Transparency

open reporting, measurable outcomes linked to Star Ratings

Quality Assurance

continuous improvement tracking and benchmarking capabilities
