GOVERNANCE LIFECYCLE

Design & Approval

The audit process begins with programme Design, followed by institutional Approval and curriculum Delivery to students.

Review & Enhancement

Assessment outcomes inform systematic Review processes, driving continuous Enhancement and completing the cyclical governance model.

EVIDENCE-BASED ASSURANCE MODEL

Institutional quality assurance is achieved through a continuous improvement loop that ensures robust governance and accountability. This cyclical model begins with systematic Evidence collection across programmes and modules, followed by rigorous Analysis of data and outcomes. The process then moves to Governance Review where academic committees evaluate findings against UK Quality Code standards.

Following governance review, targeted Action plans are developed and implemented to address identified gaps and enhancement opportunities. The cycle completes with Revalidation, where improvements are assessed and embedded into institutional practice. This continuous loop ensures that quality assurance remains dynamic, responsive, and aligned with the UK Quality Code for Higher Education 2024.
